

“Green is the  
new black”

By  Technical events  
Audio & Visual  
Company

—  
You can dream it,  
We can make it.

Based on chroma-key technology, we can integrate you into a studio that meets your visual identity and will captivate your audience in the best way.

We work with technical teams who will be able to accompany you in the most professional way to make your event unique and memorable.

>< Green is the new black

Technology  
You Can  
Trust.

we won't let you down.

The equipment we use meets the highest quality standards because we attach particular importance to delivering flawless products to our customers.

Captivate,  
Impress.  
With us.

## The world at your fingertips.

We can insert speakers who are not physically present in your studio with videoconferencing applications. You will never have been so close to your audience.

## Your content, like you've never seen before.

we integrate your content into the environment around you. Because you and your message must shine like one, we put you in the spotlight.

< Green is the new black

Beyond the  
imagination,  
our  
creations.

Heavy on  
features,  
Fair on price.

a solution that suited to all budgets.

We are convinced that our product can be used by companies of all sizes,  
which is why we offer tailor-made solutions to satisfy all our customers.

your streaming in 3 steps only.

1

analysis of your needs

each customer is unique, we know that.
